

# Object Oriented Programming

## Theory Assignment 01

Max Marks: 10

Submission Deadline: 8 Nov, 2021

### Instructions:

- Do the assignment individually.
  - Plagiarism will not be tolerated and the assignment will be graded as ZERO.
  - Feel free to ask in case of any question.
- 

1. Describe the difference between static block and instance (initializer) block. Write the difference in a way that the concept of both these blocks is clarified. Moreover, also explain when and how many times each of these blocks gets executed.
2. Write a program that uses static block and instance (initializer) block.
